Flexible Radio Connectivity

The StarterDishTM UM antennas provide waveguide connection to Ubiquiti Networks waveguide connector and Mimosa waveguide connector straight out of the box. Separately sold StarterAdapterTM enables connectivity with any radio with coaxial interface. This adapter provides a pair of RP-SMA connectors and is not part of the StarterDishTM UM package.

Slick Pole Mount

StarterDishTM antennas come with integrated pole mount. It is simple, slick, and light weight. The range of pole diameters it supports is from 20 to 55 mm (the upper part of pole diameter range is recommended for the best results).

Light Weight

StarterDishTM antennas are very light. Low weight provides multiple benefits when installing CPEs in environment with few mounting options. Low weight is also a big plus for field technicians and installation teams.
